FOR IMMEDIATE RELEASE
New Jersey Real Estate:

ACTIVE, HARD WORKING AND BUSINESS-FOCUSED SENIORS RECEIVE SCHOLARSHIPS FROM DIANE TURTON, REALTORS

Point Pleasant Beach, New Jersey (July 1, 2008) – Two high school seniors, who are straight “A” students and are planning careers in business, received college scholarships from Diane Turton, Realtors.

“Making education a life-long pursuit, having a deep passion about what you do and working hard are key pillars of personal success, said Diane Turton, who is Diane Turton, Realtors’ founder, owner and broker of record. The scholarship is presented annually to high school students who achieved excellent academic records and were involved in extracurricular activities and need help paying for their college education.

Mrs. Turton presented a \$500 scholarship to Brian Sandy, who earned his high school diploma at Point Pleasant Beach High School. And Cynthia L. Vanaman, who manages the firm’s Point Pleasant office, awarded the scholarship to Kevin Hasbrouck of Point Pleasant Borough High School. Kevin plans to major in economics at James Madison University in Virginia. Brain is enrolled at Ocean County College in Toms River and will study biology.

After college, Brian wants to pursue a career in real estate. He was introduced to the business when his mother was looking for a new home. They attended open houses, toured homes and talked with many sales associates. In addition to reading real estate publications, he followed the careers of local real estate entrepreneurs and realized that all were working to improve the communities they serve.

During high school, Brian also spent time giving back to his community. Each year at Easter he ran a fundraising campaign for Simon’s Kitchen, which serves meals to people in need. Also, he was a teen naturalist at Cattus Island County Park, wrote for the school newspaper, was active in drama club and was on the golf team.

Kevin also participated in many activities in high school. He played soccer, was captain of the bowling team and was on the baseball team that won a state championship during his sophomore year. He also was a member of the Leo Club and Future Business Leaders of America.

In fact, he was convinced to pursue a career in business after listening to Mrs. Turton’s presentation during a school program about entrepreneurship. “She really impressed me,” said Kevin. “Mrs. Turton’s passion about her work and way she spoke really struck me.”
